

# Premium Mobile App Development

High-performance iOS and Android application engineering for businesses in Dubai and the GCC that demand more than a basic app.

## MOBILE-FIRST INTERFACE BLUEPRINT

**The market is already mobile-first. Your customer journey should be too.**

When the mobile experience feels weak, slow, or fragmented, the brand loses trust before the conversation even begins.

### **The CONSAI Solution**

We transform digital ideas into seamless, premium mobile applications. Our products feel polished, credible, and commercially useful from the first touch to ongoing usage.

# Engineering built on clarity and performance

## Unified Experience

Coherent app experiences across iOS and Android. Ensures the brand feels consistent, usable, and professionally engineered on every major device path.

## Low-Friction Performance

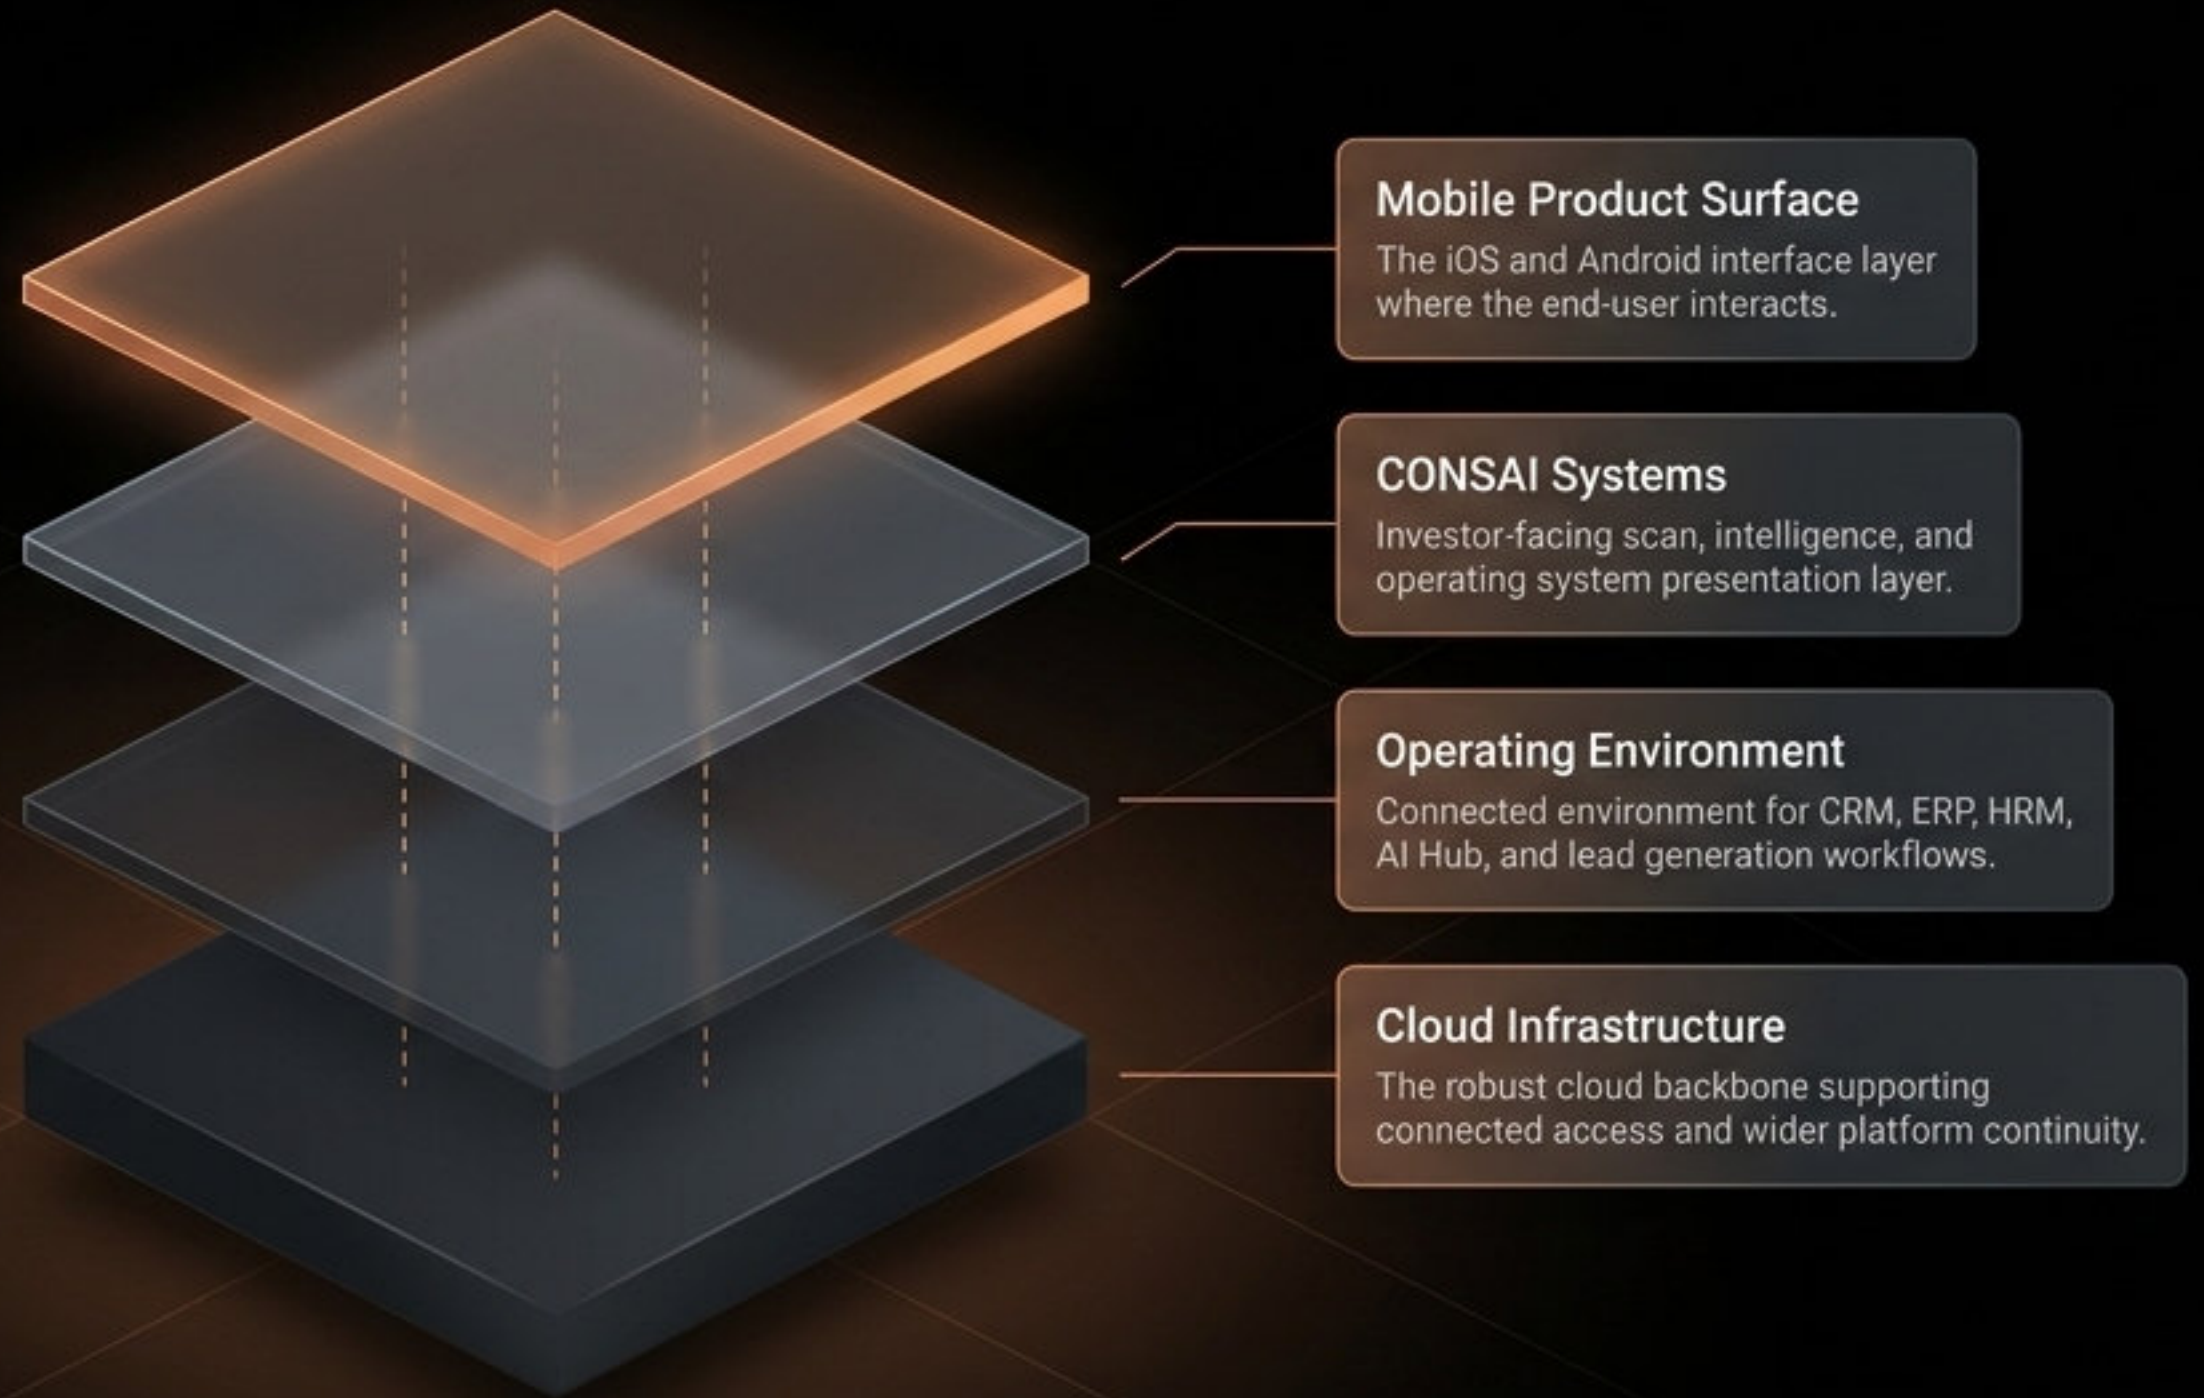

App architecture, screen structure, and UX behavior designed specifically to reduce friction and support stronger engagement across fast-moving mobile buying journeys.

## Built for Business Outcomes

Beyond appearance. The product is fundamentally shaped to support credibility, adoption, usability, and long-term growth in the highly competitive GCC digital market.

# The mobile product surface is backed by a wider connected digital ecosystem

# Architecture aligned with product requirements

High-end application engineering requires the right platform logic. We work with the strongest mainstream mobile stacks, positioning them with clarity, structure, and premium presentation quality.

## Cross-Platform

Engineered for speed, unified UI, and efficient rollout.

## Native

Engineered for premium interfaces, specific platform behavior, and high control.

# Platform Logic Decision Matrix

<b>Flutter</b> Path: Cross-Platform	<b>React Native</b> Path: Cross-Platform	<b>iOS Native</b> Path: Apple Environments (Swift, SwiftUI, Core ML)	<b>Android Native</b> Path: Android Environments (Kotlin, Jetpack)
Data Point 1 <b>Profile:</b> Fast Delivery   Fluid UI   Modern Stack	Data Point 1 <b>Profile:</b> Scalable   Flexible   Evolving	Data Point 1 <b>Profile:</b> Premium Interface   Platform Behavior	Data Point 1 <b>Profile:</b> High Control   Performance
Data Point 2 <b>Best For:</b> Businesses needing a modern product layer with efficient rollout across major mobile operating systems.	Data Point 2 <b>Best For:</b> Brands needing dynamic interfaces, scalable product logic, and an adaptable foundation for evolving application experiences.	Data Point 2 <b>Best For:</b> Projects where interface quality and refined end-user experience are central priorities.	Data Point 2 <b>Best For:</b> Product teams needing strong device compatibility and durable application performance.

# Design, engineering, and launch planning built around execution

## Step 1: Interface Quality

Structured UI hierarchy with modern spacing, clarity, and highly polished interaction patterns.

## Step 2: Engineering Stack

Framework choices strictly aligned with delivery speed, product scope, and long-term maintainability.

## Step 3: Launch Readiness

Submission support, clean responsiveness, and mobile-first polish across all critical screens for a Store-ready product.

# Application Delivery Pathways

## Startup MVP

**AED 30,000 / start**

Launch efficiently with the core mobile features needed for an initial market-ready product.

- ✓ Flutter or React Native path
- ✓ Primary iOS & Android coverage
- ✓ Essential UI/UX structure
- ✓ App Store submission support

## Professional

**AED 85,000 / start**

Full-feature product delivery for businesses needing stronger integration, richer interfaces, and an advanced execution layer.

- ✓ Custom native approach
- ✓ API & backend integration
- ✓ Payment gateway setup
- ✓ Premium interactive UI layer
- ✓ Three months post-launch support

## Enterprise

**Custom Quote**

For larger-scale environments requiring deeper security, broader system alignment, and dedicated delivery.

- ✓ High-security architecture
- ✓ Multi-user permission logic
- ✓ Full system synchronization scope
- ✓ Dedicated engineering team structure
